

CRANE TEC, INC.

***Continuing to Meet the
Unique Needs of Our Clients***

THE CHALLENGE:

To provide our customer, a leading trucking accessories supplier, with complete design build of an under running 5 ton crane system. The job incorporated the 5 ton crane system and (2) ½ ton jib cranes

SPECIAL CONSIDERATIONS:

The general contractor needed design build capabilities for the crane and runway system. Crane-Tec provided complete design of the under hung runway system incorporated into the general contractors special crane truss system.

OUR TEAM APPROACH:

Our engineers, armed with building drawings, determined runway steel and hanger design. Engineered drawings with loads were submitted to the general contractor for approval. Crane-Tec's experienced field crew installed the complete system and jib cranes in under 3 days to meet the G.C.'s demanding schedule.

5 ton under hung crane and runway system

RESULTS:

The general contractor maximized the strength of the building, Crane-Tec supplied a turn key crane system and the owner maximized floor space. The cranes were ready ahead of schedule allowing the owner to set up manufacturing machinery with the use of the overhead crane.
