

CRANE TEC, INC.

***Continuing to Meet the
Unique Needs of Our Clients***

5 ton crane and runway system

5 ton double girder crane and runway system

The Challenge:

To provide our customer, a major wire manufacturer, with multiple free-standing crane systems for a new manufacturing facility. The job incorporated a 5 ton capacity free-standing runway system and (2) 5 ton top running double girder tie-back runway systems.

Special Consideration:

The general contractor needed design build capabilities for the crane and runway systems. Existing building height limitations requires use of both single girder and double girder crane systems, both with custom low headroom hoists.

Our TEAM Approach

Our engineers, armed with the metal building drawings, determined runway steel locations and sizes. Engineered drawings with loads were submitted to the general contractor for approval.
